I was so surprised. This would be a poor investment for an Early Access game. No tutorial, which is fine if there were at least tool tips. Gameplay is bland, unbalanced, and poorly explained (How in the world does one charge?). Poor dialogue, lots of errors, etc. The issues compound, wait for .99 sale in a few years.. Not worth \$10. This could be an online Flash game for its quality and depth. Combat is simplistic yet slow and traveling is more tedious than exciting.. I don't review a ton of games but

---

this one deserves it. Game is repetitive and boring. Combat is meh, AI (when you get a hired hand) is bad. I thought it had some potential but in the end it was 2 hours of my life I couldn't get back.. Changed this from a slightly negative review to a semi positive one. THE TUTORIAL SUCKS. Once you actually start playing it it's ok. But honestly I had no Idea what I was doing the first time I played. Give it a shot.. Difficult yes, looks simplistic yet more fun than most games, the randomness really gives a unexpected moment, where everything is going well, then suddenly a crazy thing happens and changes your current game. I am really enjoying the game, I recommend it.. Buy it! Its great!. Dont review much, I had to review this one. This have many elements of FTL, its like the ftl but with swords and arrows. The replay-value is great, got 5 diferent characters to choose with specific gameplay very cool we don't have to play the same way. Overall get it you won't regre it.. Random encounts galore Simplistic, refreshing and challenging What is there not to love? 5 Stars. This game need a lot of work, but it is a promising game, at the momment the best any one can do is try to head into town without dying a horrible death on your very first step.The death mini game is pretty pointless as i see no way to even guess the right answer to the riddle in time.Many events await you, and most of them will be negative ones but the combat is nice, and it does seem like they plan to make the game more balanced.The story is pretty weak from what i saw as i spawned, you are just thrown into it, go and get the 12 runes blablabla and that is all the information you get as you set out to find the runes.The skills in this game is also nothing special, only a couple of them seems to be good to have.I would not recommend this game but once they have patched the game with their balance fixes it will atleast become more playable for those interested in playing.. Not worth \$10. This could be an online Flash game for its quality and depth. Combat is simplistic yet slow and traveling is more tedious than exciting.
