I deleted the database and created it as it was. Now it is working fine. Q: How to add multiple values to array with variable and increment index number in javascript Here's what i am trying to achieve: var customerId ='string that gets passed from the page'; var customerArray = []; customerArray[customerId] = { "id": customerId, "name": customerName, "mobile": mobileNo }; var customerArray = {}; Disclosure: I am a contributing editor for The Middle East Channel News. With a desperate desire for stability, Syria has consistently invited the West into its troubled affairs. Despite the festering, violent cancerous spread of extremist ideologies in the Middle East, the Obama Administration continues to champion regime change in Syria as if it were some sort of corporate political investment. According to the Nulandian-Obama vision, Iraq, and Syria, are "critical" Arab countries that "must" be saved from the "terror" of Islamic fundamentalism. The Nulandian-Obama worldview seems to be all about political credibility and "progressive" values, rather than the first world dominating the third world. Obama's administration's rhetoric on Syria and Iraq is more about one world rule than about the fight against Islamic terrorism. This doesn't mean that President Obama is out to destroy Islamic terrorists, only that the Obama administration's real motive lies somewhere else. A rather transparent public analysis was published in January by one of the most respected public affairs experts, William Kristol. He explained that in the Obama administration's commitment to a nuclear-free Middle 82157476af
